The grapes are harvested during the first fortnight of October. There is then a short period of maceration in contact with grape skins and their juice in order to draw out the very particular aromas which characterize this variety and to obtain the desired tones. Fermentation takes place at 16°C to preserve the aromas extracted.

Dark and brilliant pink color,

its bouquet presents the strawberry aroma so characteristic of the Bobal variety

The fruit character is confirmed on palate, with a refreshing acidity. Its aromatic persistence allows the spirit of this wine to linger on the palate for a long time.

Recommended with rice dishes, sausage, pasta and white meat.

Best served cold (6-8° C)
