The Cabernet Sauvignon grape variety is well adapted to the Spanish Mediterranean. Iniesta is a winemaking paradise with a particular micro climate that facilitates the perfect maturation of these grapes and allows for the development of their own unique characteristics.

On appearance this wine shows a bright red ruby colour.

The nose is clearly representative of the variety, showing sweet and intense blackcurrants.

Its bouquet is confirmed on the palate with the concentrated blackcurrant and raspberry aromas supported by an integrated tannin structure and well balanced acidity. This is a harmonious and well structured wine with a pleasant aftertaste.

Recommended with red meat, rice dishes, roasts and sausages.  
Best served cold (14-16° C)
