The grapes are harvested during the second fortnight of August. After a short cold maceration period followed by sedimentation the must is fermented, with absolute limpidity. Fermentation is slow and at 16°C to preserve the valued raw material..

Limpid and translucent, pale yellow in color with iridescences which bring to mind white gold.

The variety demonstrate their potential in the bouquet with the harmonious conjunction of white fruits aromas (orange blossom, peach, pear), apple and herbal aromas (fennel and aniseed).

The bouquet is confirmed on the palate and the sensations of volume and balanced with acidity afterwards. A harmony that can leave no one indifferent.

Recommended with aperitif, starters, salads, fish and selfish.

Best served cold (6-8° C)
